## **Workshop on Human Resource Management for improving Quality of Working Life and Labour Productivity, Stockholm May 27, 2005**

WORK-IN-NET is a consortium of research financiers in EU-countries with common interest and programme initiatives concerning innovative work organization, social inclusion and business development. Its purpose is to exchange experience and professionalism on good practices, evaluation methods, forms of dissemination concerning the field of innovative and inclusive work organizations as well as possible joint calls in the future.

WORK-IN-NET will bring representatives of business, labour market organisations and public bodies as well as representatives from the research communities in all partner countries together.

Within the work package on information exchange the three selected thematic issues will be decided upon in detail and working and task groups (WTG) on these themes established. This workshop aims at a qualified and policy oriented discussion concerning Innovative human resource management for improving quality of working life and labour productivity
